MI-WAVE3D

⟫ WAVE3D

DIGITAL 3D SYSTEM

FOR THEATERS LOOKING TO
CONVERT TO 3D OR ADD MULTIPLE 3D SCREENS

The WAVE3D offers an economic option for digital 3D presentation. Using an automated liquid crystal polarization modulator, the WAVE3D is an easy way to bring studio-approved 3D cinema to your customers.

/ ECONOMICAL
The WAVE3D is based on LC technology, making it a smart choice for cinemas looking to add 3D screens to their theater or to convert screens to 3D.

/ FULLY AUTOMATED
The WAVE3D is automated for 2D/3D positioning with the included sliding actuator.

/ LIGHTWEIGHT PASSIVE EYEWEAR
The WAVE3D uses extremely comfortable and cost-effective passive 3D glasses, enabling you to reduce operating costs and avoid battery replacement issues. These glasses are available in a variety of designs and themes.

/ EASY TO SET UP
The WAVE3D is easy to install, with pedestal and wall-mount adapters included. The filter unit also includes a built-in control console with display for convenience.

/ STUDIO CERTIFIED
The WAVE3D is studio-approved and HFR-ready, allowing you to present the latest Hollywood 3D content at your theater.

/ TRUST
MasterImage 3D delivers the ultimate 3D experience to theaters and audiences around the world. Over 7,000 MasterImage 3D systems have been installed worldwide.
